CALIFORNIA PROPOSITION 65 WARNINGS:

Proposition 65 is a California law that requires companies to inform consumers in California about minuscule levels of certain chemicals found in their products which are sold and purchased within the state of California. Though a product may contain a Proposition 65 warning label or marking, it does not mean the product is a threat or danger to the consumer. Although Peterson Electro-Musical Products, Inc. is committed to the quality of our products and the safety of our consumers, and we are unable to determine the exact make-up of every component included in our products, we are confident that they all fall under the safe harbor limit (see below). Unfortunately, we have no way to determine this conclusively. For that reason, the following list is our best effort to make customers aware of the slight possibility that there could be some level of one or more of the nearly 1000 chemicals included under Proposition 65.

 **WARNING:** Cables, Cable Assemblies, and Printed Circuit Boards can expose you to chemicals including lead and lead compounds which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov

 **WARNING:** Lithium-ion Batteries and/or products that contain Lithium-ion Batteries can expose you to chemicals including cobalt lithium nickel oxide, and nickel, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov

 **WARNING:** Electrical cords, cables, product cords, wire assemblies, and carrying cases made with PVC can expose you to chemicals including DEHP, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov

 **WARNING:** Plastic cases, plastic housings or other plastic components made from polycarbonate or other plastics can expose you to chemicals including bisphenol A, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov

More information is available at the [Proposition 65 website](#).

Safe Harbor Level

OEHHA develops numerical guidance levels identified as [Safe Harbor Levels](#). The numerical guidance levels are an effort to assist businesses in determining if they may have "safe harbor" from Proposition 65 warning requirements and discharge prohibitions. Safe Harbor Levels have been established for many of the chemicals listed under Proposition 65. They include No Significant Risk Levels (NSRLs) for cancer-causing chemicals and Maximum Allowable Dose Levels (MADLs) for chemicals that cause reproductive toxicity. If exposure to a chemical occurs, or if discharges into drinking water sources are at or below the safe harbor level, they are exempt from the Proposition 65 warning requirements.
